Who Are We?

We are a community of companies that design, produce, and implement architectural, interior design, and industrial products in various regions of the business world. All companies are managed with their own capital.

Türkiye

It is established in Istanbul, Turkey. It serves as the production facility for all other companies. It is responsible for the manufacturing and implementation of metal, wood, flooring, electrical, and all other decoration works. With its 8000 m² existing production facility, it collaborates with over 20 expert companies in project management.

bsban.com

U.S.A.

It is established in Florida, Miami, USA. It manages project investments in Florida and undertakes real estate projects with its own capital. It handles the marketing, implementation, and warehouse management of the group's other architectural, interior design, and industrial products in the United States.

globeartgroup.com

U.K.

It is established in London, England. It engages in project investment activities in London. It handles the marketing, implementation, and warehouse management of the group's architectural, interior design, and industrial products worldwide. It serves as the marketing headquarters for the group.

globeartgroup.co.uk | globeartgroup.uk

Italy

It is established in Milan, Italy. Our design company collaborates with partner companies. Architectural, interior design, kitchen, bathroom, and furniture designs. The company has a Research and Development branch in Istanbul.

desalli.com | desalli.it

Türkiye

It is established in Istanbul, Turkey. It is the implementation and installation company for all other companies. It handles the fine construction, assembly, and service management of all projects belonging to the group. It is organized based on the region where the project is located.

alvo.com

Design

All designs have been prepared by Italy Desalli S.R.L. and its Istanbul branch. In the field, together with famous names , architectural and industrial needs, with lines that will determine the sector trend, creates a difference in the awareness of production by designing within the scope of ergonomic elements.our production capacity, we produce designs with a very high realization rate.

Manufacturing

Our production knowledge, usage area and machine park, we carry out the production of industrial or boutique projects within our own structure. We continue to provide services with our metal, wood, acrylic, injection, electronics and assembly departments with our wide expert staff and machines.

Manufacturing

R&D

We produce functional solutions with our technical staff in areas such as architecture, industrial, mechanical, electronic and injection with the strength we get from our design and production experience.

Our technical team do all detailed researches with great care in order to apply the product to the field in the most ergonomic way.

We follow the current technologies and make the necessary research and development.

Service

After the sales of the projects, we carry out the installation processes of the project with our services throughout Turkey and all over the world. We also provide customer satisfaction and high service needs after installation.

Logistics & Storage

We do provides both logistics and storage operations of all products from industrial products to architectural products.

It controls the product storage and shipment speed to the warehouse areas in the centers and regions. In this way, the speed of transportation and final point transportation is ensured.

We also have warehouse spaces in cities such as Milan, Miami, Washington and London.

The background features a dark, semi-transparent overlay of architectural drawings. On the right side, there is a detailed line drawing of a car, possibly a sedan, shown from a top-down perspective. On the left side, there are various architectural floor plans and sections, including what appears to be a car's footprint within a building layout. The overall aesthetic is technical and professional.
