R&D

We produce functional solutions with our technical staff in areas such as architecture, industrial, mechanical, electronic and injection with the strength we get from our design and production experience.

Our technical team do all detailed researches with great care in order to apply the product to the field in the most ergonomic way.

We follow the current technologies and make the necessary research and development.

Service

After the sales of the projects, we carry out the installation processes of the project with our services throughout Turkey and all over the world. We also provide customer satisfaction and high service needs after installation.

Logistics & Storage

We do provides both logistics and storage operations of all products from industrial products to architectural products.

It controls the product storage and shipment speed to the warehouse areas in the centers and regions. In this way, the speed of transportation and final point transportation is ensured.

We also have warehouse spaces in cities such as Milan, Miami, Washington and London.

The background features a dark, monochromatic architectural rendering. On the right side, there is a detailed line drawing of a car, possibly a sedan, shown from a three-quarter perspective. On the left side, there are faint architectural floor plans or site layouts, including what appears to be a parking area with several rectangular spaces. The overall aesthetic is professional and technical.
